

## Create Flask project

Date	17 November
Team ID	PNT2022TMID51760
Project name	Smart Fashion Recommender Application

Flask code and running:

The screenshot shows a Visual Studio Code editor with a Python file named 'app.py'. The code defines a Flask application with a single route '/' that returns 'Hello, World!'. The terminal window at the bottom shows the command 'python app.py' being executed, and the output 'Hello, World!' is displayed. The terminal also shows the Flask version '2.0.1' and the Python version '3.10.7'.

```
1 from flask import Flask
2
3 app = Flask(__name__)
4
5 @app.route("/")
6 def hello_world():
7     return "Hello, World!"
8
9 if __name__ == "__main__":
10     app.run()
11
```

```
Python 3.10.7
PS C:\Users\ACER\Desktop> python app.py
Hello, World!
```

Output:
